

# Magister C24 with Cellbind

	Column agglutination techniques	Immunofixation with column technology	
Easy to interpret	✓	✓ ✓	
Reagents free of position	—	✓ ✓	
Clear and sharp results	✓	✓ ✓	
Minimal risk on false interpretation	—	✓ ✓	
Allowing optimal digital processing of data	✓	✓ ✓	
Minimal occurrence of smear in column	—	✓ ✓

# MAGISTER C24

## first compact fully automated blood group analyser

Magister C24 ensures safe, accurate and efficient blood group analysis

### Magister C24 is flexible and fast:

- Fully automated
- Table top, low footprint
- Continuous loading
- Easy to load
- Stat samples
- Connected to LIS
- Modular, hence low maintenance time

**FLEXIBLE  
ECONOMIC  
SAFE**

# CELLBIND

## immunofixation column technology

One type of card for all tests

**FIT  
FOR THE  
FUTURE!**

### Cellbind Screen:

- Limited stock and storage space required
- Next sample on the same card: use all columns

### Cellbind Screen suitable for:

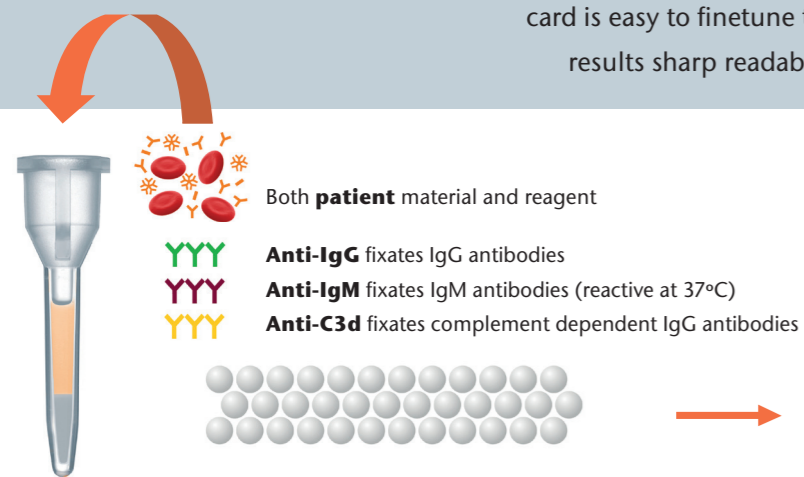

- Screening and antibody identification
- Typing of blood group antigens
- Reverse typing
- Crossmatch
- Direct Antiglobulin Test
- Antibody titration

### Magister C24 and Cellbind

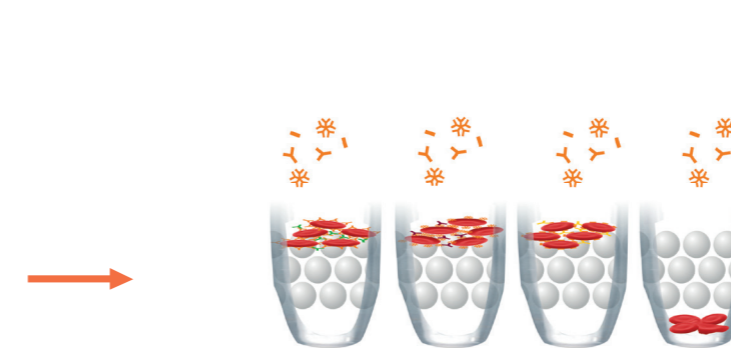

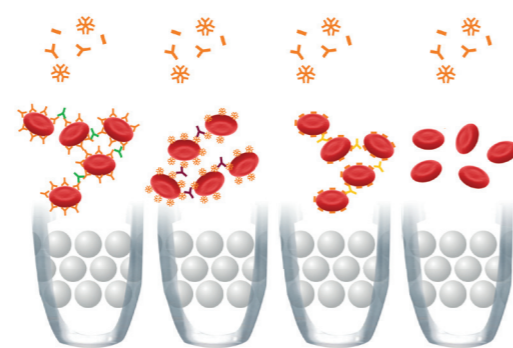

a single card for any protocol > minimal stock required  
card is easy to finetune to your protocol > suits your own designed protocol  
results sharp readable above and below in gel > precise and clear results

### benefits for your practice:

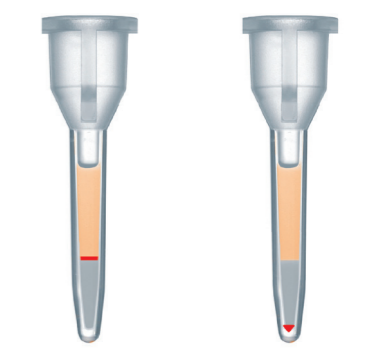

software interprets reactions of the columns > human mistakes are prevented  
next sample may start on the very next available column > no spillage  
protocols are easy to adapt > ideal when diagnostic guidelines are altered

**Optional incubation 15 minutes 37°C**

**Centrifugate for 10 minutes**

**positive      negative**
